THE SPINE OF SUM BUNNY

A Minimal Path Through the Sum Bunny Canon

The Ark Hive Press collection contains a large and growing body of work spanning systems theory, cosmology, narrative evolution, institutional analysis, and the philosophy of meaning.

These texts are interconnected, but they were not originally arranged as a linear sequence.

This document defines a spine: a single constrained path through the system.

The purpose of the spine is not to summarize the work, but to structure its traversal. Each text performs a specific function. Together, they form a progression in which constraint increases at every step.

This path moves:

from systemic failure
to governing law
to breakdown mechanics
to perception and control
to meaning and constraint
to cultural evolution
to cosmological generalization
and finally to ethical consequence

The sequence is intentionally narrow. It excludes redundancy, parallel explorations, and non-essential extensions.

This is not a “best of” selection.

It is a load-bearing structure.

Each step depends on the previous one. Skipping forward reduces coherence. Moving backward reinforces it.

The path is designed to be traversed in full.
